- SYSTEM ANALYSIS

# Safe Zone App Services

- The Safe Zone app is designed for car owners who are traveling, and they can not take care of their cars.
- Is designed to provide users with a secure and convenient solution for parking their vehicles.
- They can view live video streams of their parked cars, ensuring peace of mind and add security against theft or damage.
- Allowing users to keep an eye on their vehicles from anywhere and any time.
- It allows users to find and reserve parking spaces in designated Safe Zone parking lots.

# CUSTOMER PROBLEMS

- LACK OF SECURE PARKING
- TIME-CONSUMING SEARCH FOR PARKING
- REMOTE MONITORING
- THEFT AND DAMAGE
- CONVENIENCE

# OUR VISION

We seek for providing luxury services for vehicles of the A A class and to expand & Stand still in the market, to raise our market share & to raise revenue .

# OUR MISSION

to provide the user with secured & safe parking lots , sending him regular updates on his vehicle in an attempt to reach the customer satisfaction.

# Differentiation

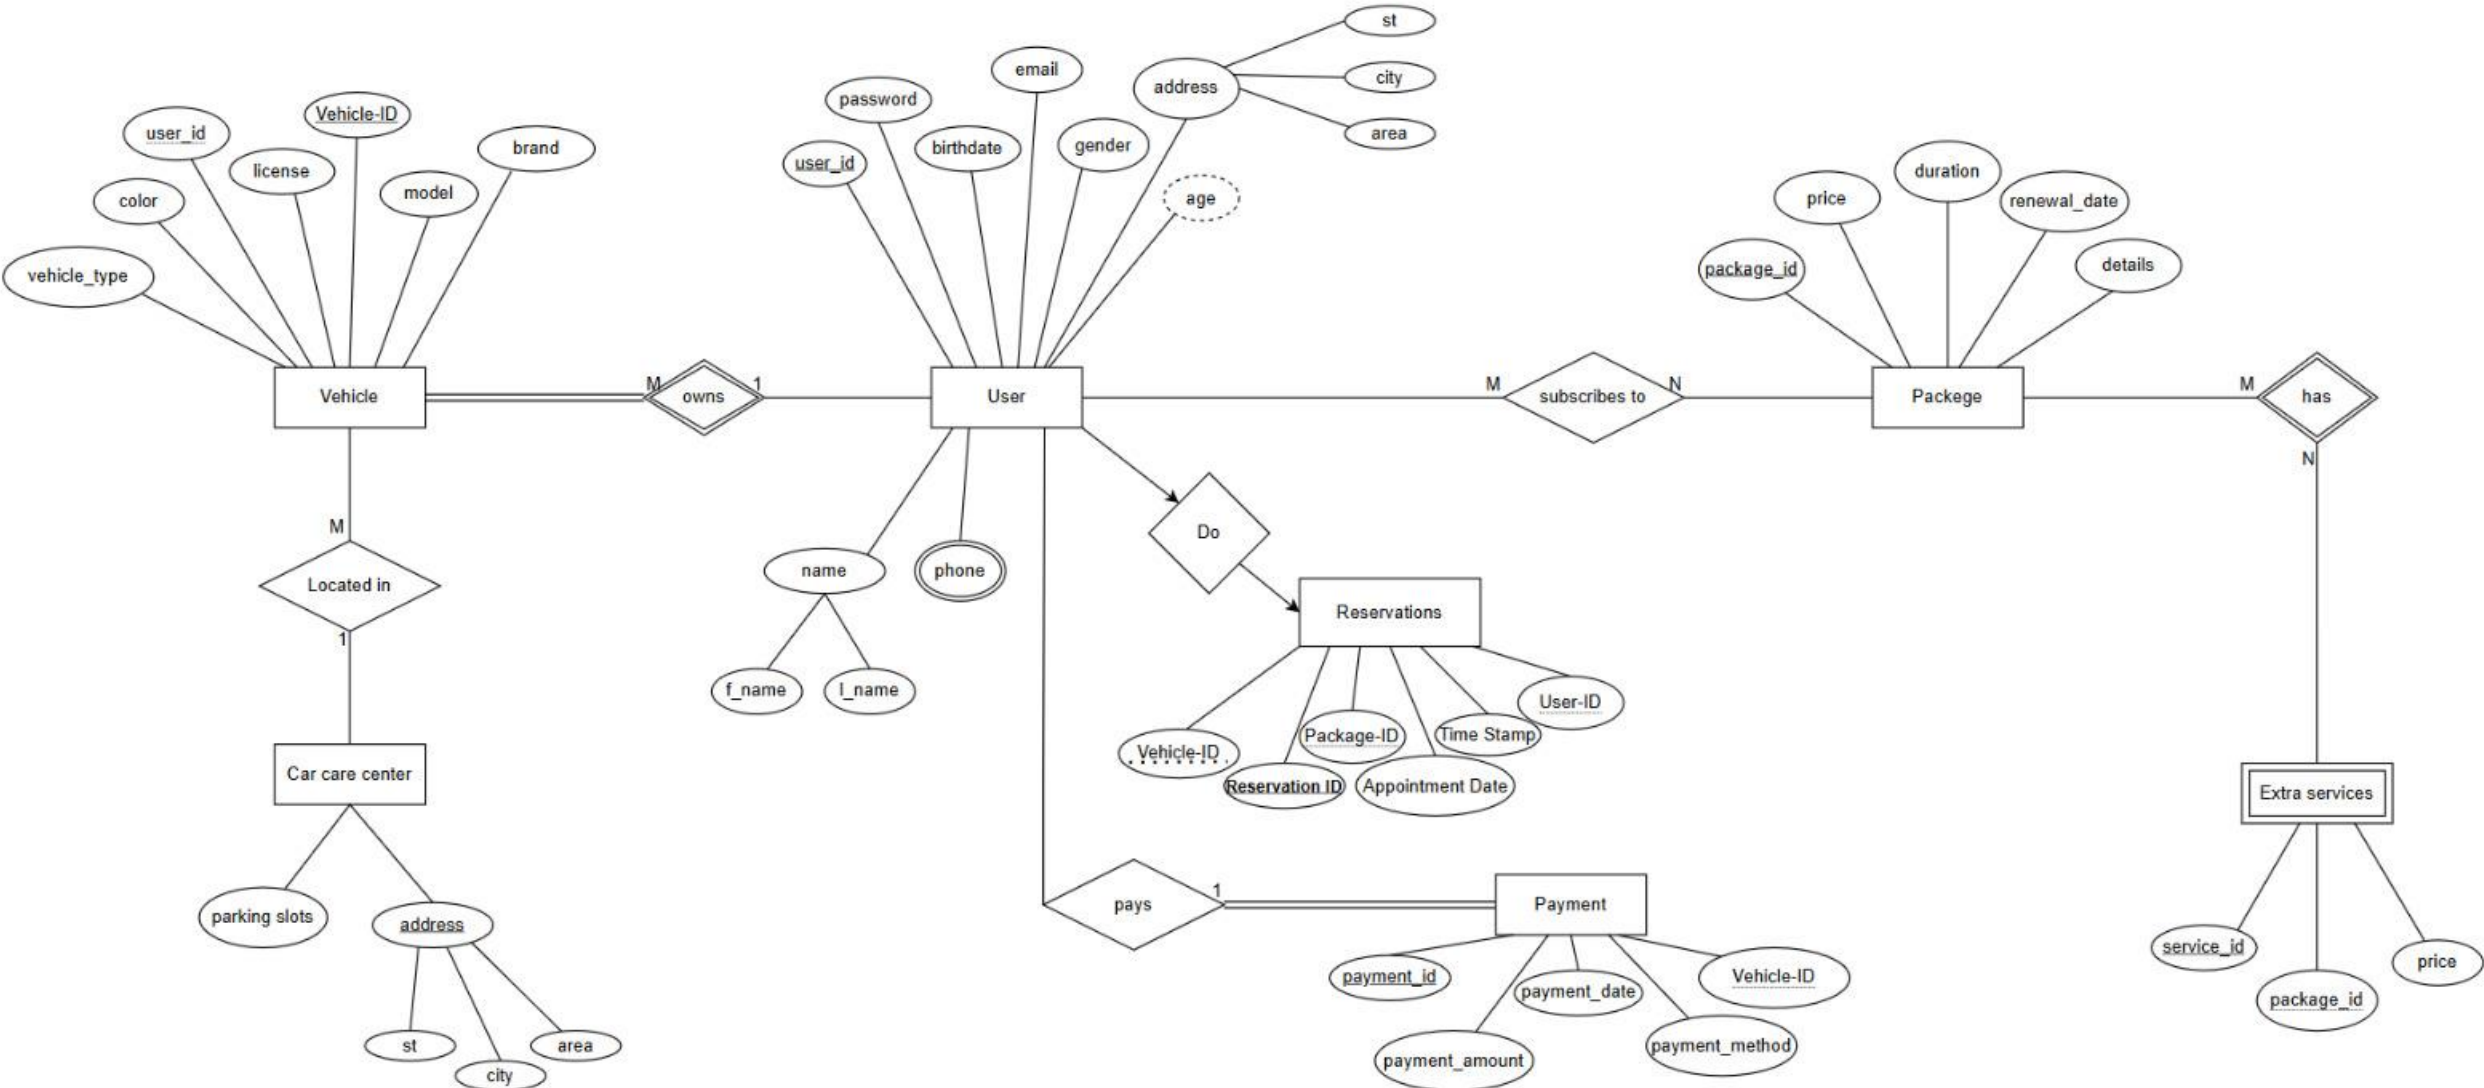

With the spread of smartphones , this made the users more comfortable with mobile apps in their service reception. So , This trend provides us to build a strong foundation for the adoption of a car services app.

# Market Demand

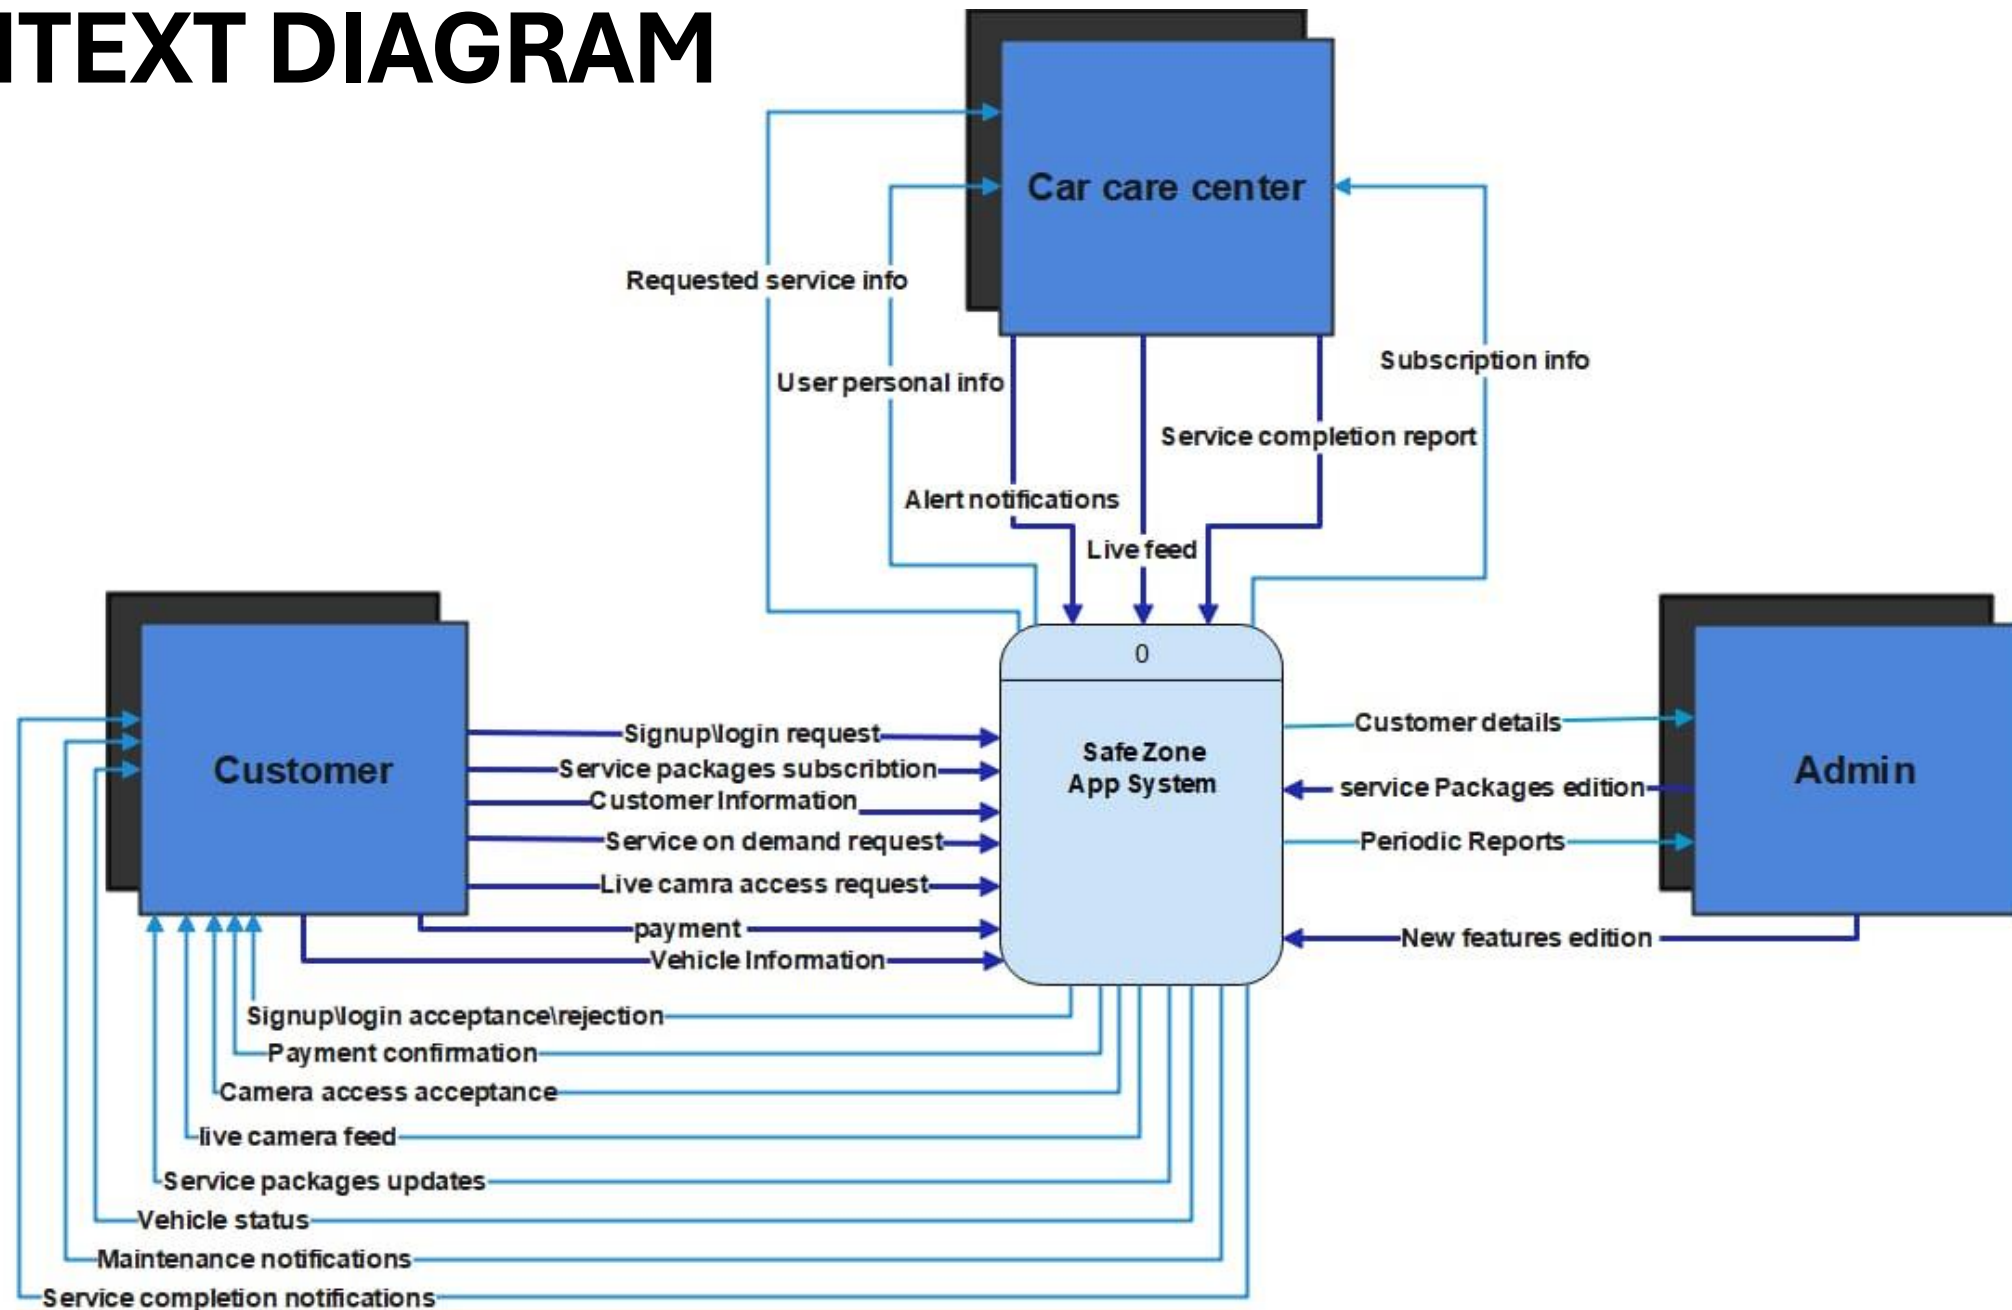

The increasing reliance on vehicles for daily transportation has created a great demand for efficient and reliable car services.
